# Wax Rings

## Product Specifications

### Description

Mainline wax rings fit 3" and 4" waste lines. They extend short horn bowls and will not harden or deteriorate. They form a gas-tight, odor-tight and water-tight seal.

### Directions for Use

- Be sure the wax ring is at room temperature (about 70°F). If wax ring is too cold a good seal may not be made or the toilet bowl could crack while making the installation.
- With the toilet bowl upside down on a protective pad or blanket, place the wax ring around the discharge opening. Press firmly to assure adhesion when the toilet is inverted.
- Using Mainline Stay Soft Putty make a putty ring about 1 inch high around the outside rim of the toilet. This will make a seal between the toilet rim and the floor.
- Carefully set toilet down on bolts and twist bowl slightly to spread wax and putty to make a tight seal. Tighten bolts carefully to prevent breaking the bowl.
