

INSTALLATION

Pedestal Lavatory

INCLUDED PARTS

A Toggle Bolts and nuts x2

B Lag Bolts x2

INSTALLATION TIPS

Luxart suggests using a locally licensed plumber for installation.

Installation

1. Shut off the water supply then disconnect and drain the water supply lines.
2. Locate proper position for pedestal lavatory. Make sure that you have access to all plumbing and drain fittings, door clearance and any other obstructions.
3. Place pedestal basin on pedestal leg and move into the desired position against the wall. Make sure that the pedestal basin is levelled on the pedestal leg. With a pencil, mark the location of the pedestal basin support holes on the wall (**FIGURE 1A**).
4. On marked location on the wall, drill holes with a $\frac{5}{8}$ " drill bit if the pedestal will not be attached onto a stud. If the pedestal will be mounted onto a stud, then drill holes with a $\frac{1}{8}$ " drill bit.
5. Carefully remove pedestal basin from pedestal leg and install faucet and pop-up assembly as per the manufacturer's installation instructions.
6. If installing directly onto the wall without a stud, use toggle bolts. Push toggle bolts through the backside of the pedestal basin. Place rubber washer, steel washer and hex nut loosely on the end of the bolt (in this direct order). Then place the pedestal basin on the pedestal leg. Place the complete unit into the desired position on the wall at the same time pushing the toggle bolts through the pre-drilled holes on the wall (**FIGURE 2A**).

OR

If installing directly onto a stud, use lag screws. Place the pedestal basin on the pedestal leg. Then place the complete unit in the desired position on the wall. Place metal washer and rubber washer onto the lag screw (in this direct order) and at the same time fastening the pedestal basin directly onto the stud by screwing the lag screw into the stud (**FIGURE 2B**).

Installation

7. Tighten hex nut (stud application) or toggle bolt (wall application) until pedestal basin is snug against the wall.

Caution: Do not over tighten as this could break the porcelain.

Note: Pedestal leg should be supporting the pedestal top, since mounting lips are not designed to hold the weight of the pedestal top.

8. Apply a neat bead of bathroom silicone or caulking around the edge of pedestal basin and where the basin contacts the wall and where the pedestal basin connects onto the pedestal leg (**FIGURE 3**).
9. Complete any final plumbing connections, such as the lavatory supply kit, as per manufacturer's instructions.

Beauty in every detail.

Luxart® products will be covered by Foremost Groups, Inc.'s limited warranty. It is as follows: Foremost warrants its products to be free from defects in material or workmanship (Vitreous China) and 1 year (Parts and Fittings) from the date of purchase original purchaser.
