

Available Spring 2007

NEW Smart Cap™
Closet Bolt Cover Cap

Patent pending

- Taller cap eliminates the need to cut brass bolts.
- Base creates a tight seal that helps provide a continuous sanitary seal between base and china
- Great for new installations and can be installed on existing toilets

Never cut brass bolts again. Bolts that are cut become too short to reuse when additional flooring is added.

Base is installed between the bowl and nut.

Cap screws onto base for a secure connection.
